

Figure 3 (FER-216). Detailed trench log of one active strand of the Rose Canyon fault zone, looking northwest. Age of sample C-2 is 8300 ± 580 years; sample C-7 is 7870 ± 630 years. Units A and B are soil horizons A and Bt, respectively. Units C and D are alluvial or colluvial deposits. Trench location is shown on Figure 5a, loc.23a. (From Lindvall and others, 1990).
